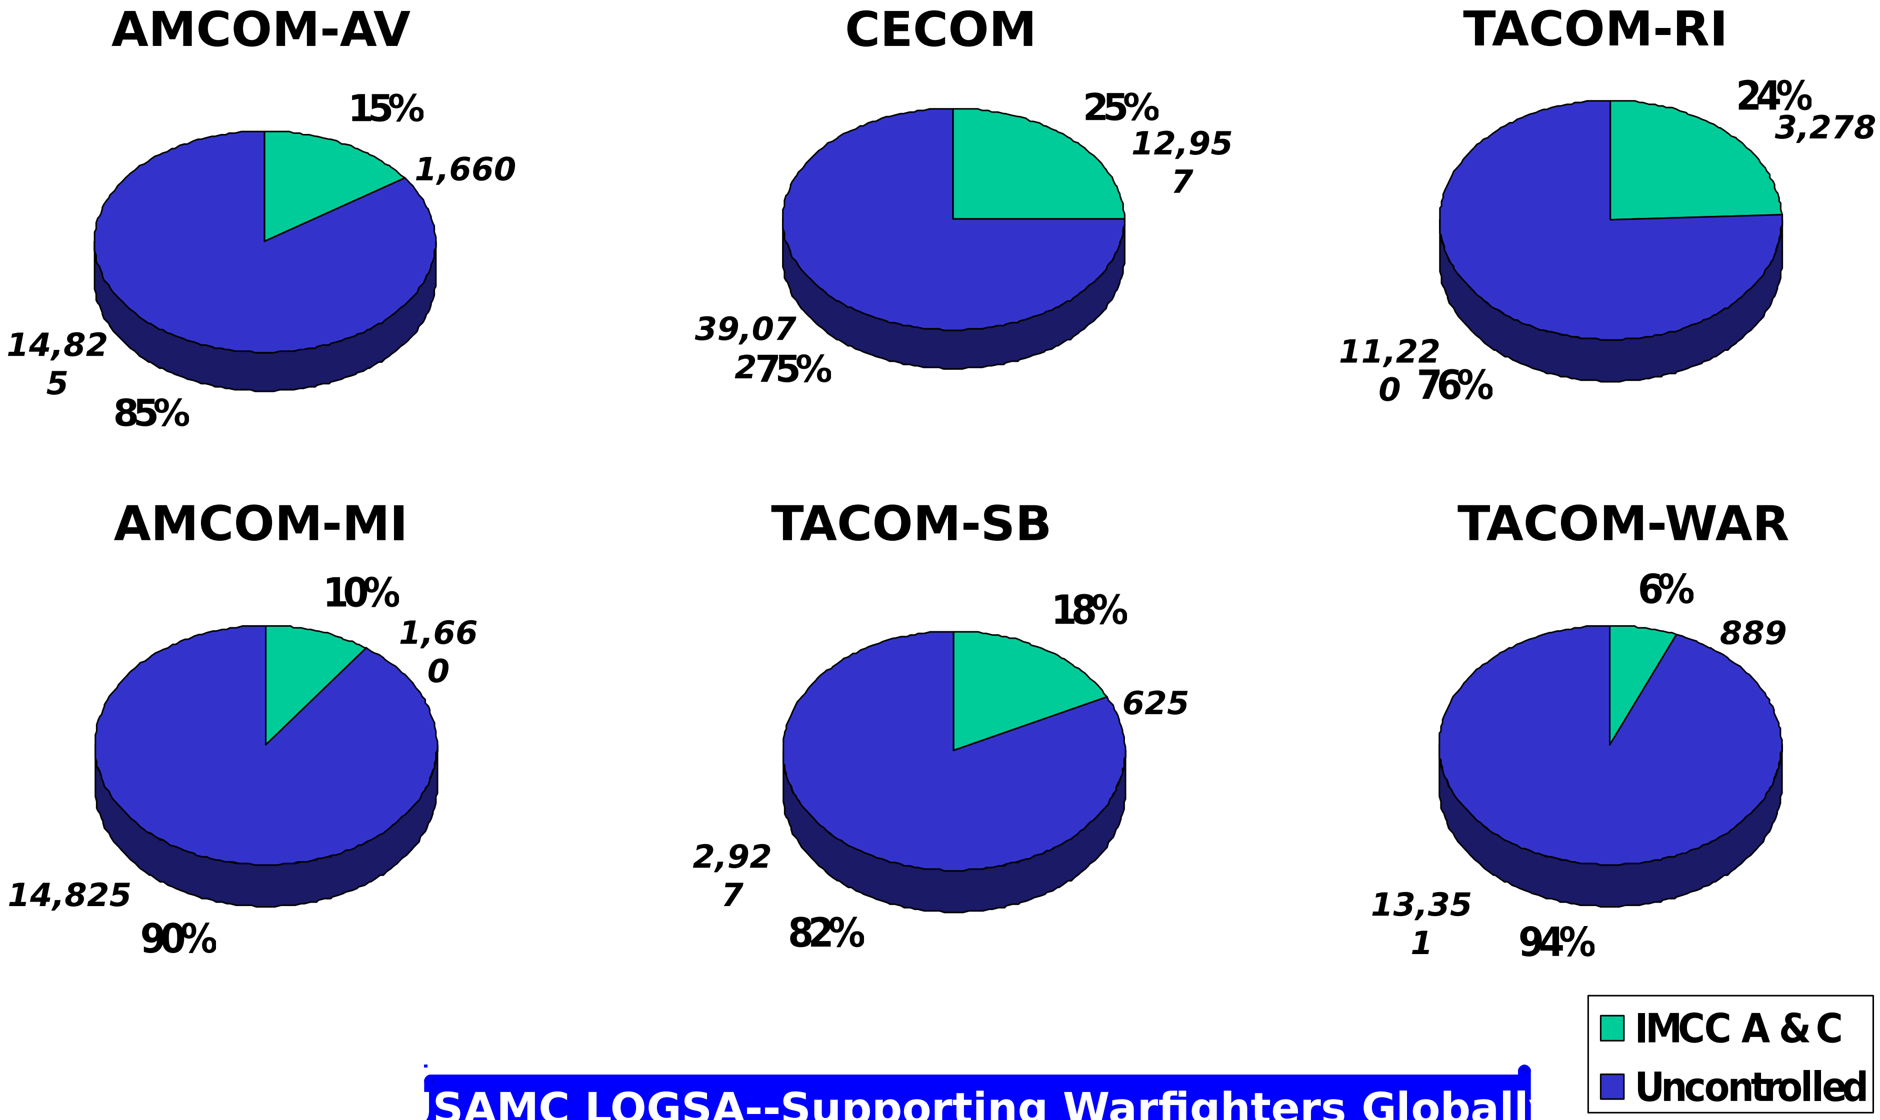
IMCC A and C vs. Online Processing Secondary Items Managed by ICP – Jul 05



Breakout of Controlled Items

	IMCC "A"	IMCC " C"
AMCOM-A	1,346	1,319
AMCOM-M	1,173	487
CECOM	12,772	185
TACOM-W	505	409
TACOM-R	1,503	1,775
TACOM-SB	501	124

IMCC "C" requisitions are run thru the Control Item Logic File (CLF). CLF is an IMMC tool that facilitates automatic processing. CLF completes processing for many "C" coded items based on parameters placed in the CLF, e.g., designated DODAACs, priorities, quantities, etc. Only requisitions not meeting CLF parameters will ever kick off-line for processing.
